MAJESTIC IS ONE OF STATE'S BEST

Beaver County Visitors Say That Property Is Getting Into Great Shape.

RICH AND EXTENSIVE RESOURCES ARE FOUND

Manager Moffat Says Mine Looks Entirely Too Good to Give Details.

Visitors from Beaver county unanimously agree that the management of the Majestic company is developing one of the greatest mines in that part of the state, and they claim that were the exact facts known it would be seen readily that this proposition is going to be one of the great properties in Utah. It was stated yesterday by a wellknown mining man that a few days ago twenty-five mine cars of ore were hoist-ed just as the ore was broken down.

A grab sample from each car was taken as the ore was deposited in the bins, and the average value of the rock was 56 onnees silver, 24 per cent lead and 4.5 per cent copper. This ore came from the south drift, and there is a full face of such rock being broken steadily, and this has been the case for the past forty-eight feet. The width of the ore forty-eight feet. The width of the ore body is unknown. It is said that a pick can be driven to the eye at any point of the face, while it is no trouble at all to drive a shovel deeply into any portion of the floor. Going north on the same ore body, the management has drifted for fifty-seven feet, and exactly the same conditions exist there. Those who know say that the rock is by no means silicious, but carries a high excess of iron, which will make it extremely desirable for smelting purposes when the company decides on shipments to market.

shipments to market.

General Manager Moffat was remind of these reports Saturday morning,

The Majestic looks better day to day, and I feel confident that we are going to open a big producer. I do going to open a big producer. I do not want to give you details at this time, the mine looks too good to be talked about. As to the assay values given you, they are correct."

When asked when the company intended to sink on this ore and develop it at continually better levels, Mr. Motfat said that he had found it entirely too difficult a matter to case develop-

too difficult a matter to cease developing the ore where it is opening so splendidly, but he hoped soon to be able to drag himself away from that interest-

RED BUTTE OPERATORS PREPARING FOR ACTIVITY

RED BUTTE, Nev., via Humboldt House, April 21.—In the last report on this district the Monte Christo group of the Coveney brothers was described. the Coveney brothers was described. Continuing north, and adjacent to the camp or townsite, on the north, lies the Warrior group of five claims, the property of Holcomb and Andersou. This group takes in the apexes of two or three porphyry hills near the foot of the main range of Jackson mountain on the southwest, and rises gradually from the swall group of tents clustered. from the small group of tents clustered around Benita Spring, where the camp is established. This spring has a steady flow of good, pure water, which will fill a four-men pape. The have splendid showings of gold-silver-copper-lead in well pronounced veins of quartz extending in a northwesterly and southeasterly direction. Development work is not very extensive, but several good showings have been further improved in doing the location and annual work on the exposures made by nature The copper occurs in the form of tetrahedrite, and assays show a valued content of \$20.20 gold, \$4.50 in silver,

and 10 per cent copper. North and west of the Warrior group Ramel and Schmierer adjoin, with the Redcemer and several other claims. They call this the "gold group," and it is truly named. For a distance of \$20 feet along the vein, exposed by shallow cuts and trenches, it pans free gold. The exact width of the vein has not been determined, but at places it shows a width of from four to six feet. This vein shows values in gold, silver, copper and lead, and the highest assays received have given returns of gold, \$20; silver, 89 ounces; copper, 12 per cent, and lead, 8 per cent. An incline shaft following the vein on a slight dip to the northeast has been sunk to a depth of twenty-five feet, and fifteen or twenty tous of smelting ore have been saved. This shaft will be continued to greater depth, the work being planned to start in a very short

W. M. Anderson, president of the Nevada-Anaconda, arrived in camp from Berkeley, Cal., the middle of this week, and will put a force of men to

Fred Muscott, heavily interested in several groups, is also here for the year, and is ready to prosecute development

Frank Clark, F. J. Morin and wife, all owning promising prospects in the district, are expected in by May 1. Word has been received from Salt

Lake that a party of seven or eight engineers and operators, under the guidance of D. C. Holcomb, secretary-treasurer of the Nevada-Anaconda, are planning to leave for the district about Mac 2

May 3.

With the advent of the Western Pacific, daily drawing nearer, and the introduction of outside capital. Red Butte will soon be occupying a prominent position in the mining world, deserved through the immensity, richness and widely distributed area of the already known ore deposits. known ore deposits.

NEW EXCHANGE READY FOR FIRST ELECTION

Meeting Called to Organize Enterprise for Saturday Afternoon, May 1.

For the purpose of perfecting the organization of the Utah Stock and Mining Exchange, a meeting of the members of this new enterprise have been notified that a meeting will be held at 2 o'clock in the afternoon of Saturday, May 1. C. W. Hartley, the promoter of the exchange, stated Saturday that all subscriptions for mem-berships should be paid in full by the day of meeting, as none but those bearor meeting, as none out those bearing membership cards will be given the opportunity to attend this meeting.

The business of organization will be the election of the board of governors.

and the appointment of various com-mittees. Prominent mining and busi ness men have been chosen for the board of governors, those named being David Keith, David Evans, Windsor V. Kiee, Ezra Thompson, Frank J. Westcott, B. F. Grant, James Murdoch, all of Salt Lake City, and the following two gentlemen: J. P. Creer of Spanish Fork and Joseph Berry of Provo.

In view of the hard work that has

In view of the hard work that has been done by Mr. Hartley and associates, and the support that has been accorded the exchange both at home and throughout the state, the organiza-tion is considered near active business on the election of those who will have the management of the enterprise in hand

ENCOURAGING RALLY IN STOCKS ON SATURDAY

There was a very encouraging rally to the stocks Saturday morning, and all the eaders which have been suffering fo many days past showed considerable power of recuperation. It was a busy morning, and brokers say that the public is coming to the rescue again. During the session 110,450 shares of stock sold, the market value of which was \$70,048.62. The total sales for the past week amountd-to 761,247 shares of stock, the value eing \$523,927.61. The following were the losing unlisted and listed stock transac-

OPTION CLOSED ON TINTIC PROPERTY

Tintic Mines Company Makes Payment Saturday on Several Valuable Claims.

MORE GROUPS ARE HELD UNDER OPTION

Company Composed of Prominent Eastern and Utah Mining Operators.

It was ascertained Saturday that a by the Tintic Mines company had been exercised, and that the first payments were made yesterday morning. This fact was substantiated by R. J. Evans. one of the officials of the company. The options exercised were on the American Star, Black Bird, Triangle, Town View and Town View fraction claims, all being situated in the Tintic mining dis-

The above mentioned claims are only a small portion of the total number now held under option by the Tintic Mines company, and there is not the least doubt as to the company taking over all the other properties according to the terms of the various options. Although the company is one of the new organizations, it has secured some of the most valuable undeveloped claims to be found in the Tintic district, the properties extending so as to include a generous portion of the three great mineral zones that extend through the

report was made recently by a well-known engineer on the properties of this company. This report shows that the west of Eureka zone has shown that the west of Eureka zone has shown ore continuously for \$000 feet in a series of stopes having a vertical range of from 400 to 1600 feet. The zone has paid dividends at the rate of \$1600 per linear foot all the way, or something like \$14,000,000. The middle or mammoth zone has shown ore continuously for 5000 feet as far as developed, and has paid \$6,000,000 dividends. This zone has a vertical range of 1600 feet. The east zone has been demon-strated for 20,000 feet continuously, and has paid \$3,000,000 in dividends, being the newest zone to be developed in the camp.

The Tintic Mines company is com-

ing men in Utah, and identified with them is strong eastern interests the identity of whom has not been given to the public.

Stock Letter.

Rawhide Queen ... Rawhide Coalition

James A. Pollock & Co., bankers and brokers, furnish the following, received over their private wire yesterday afterbrokers, furnish the following, received over their private wire yesterday afternoon:

Dick Bros. Stock Letter. New York.—
Again today the market followed its new custom of turning strong on Saturday, after showing weakness on Friday. There was a general advance, which resulted in substantial gains in many stocks. No attention was given to the Turkish situation, but the further break in wheat was a favorable influence. B. R. T. developed marked strength and we hear strong bullish talk on it for next week. We expect better prices for Katy. N. Y. C. and the metal shares, particularly Smelters; Rock Island issues, including Frisco second preferred, also seem very promising. The outlook is for generally higher prices next week.

Hornblower & Weeks Letter, Boston—Market opened quiet and steady. North Butte was a feature among the coppers, while American Telephone leads the home investments. The coppers were frequiar, while the others continue strong. The tone throughout the list was good and traders are looking for a rally, especialist in the copper shares, and believe there will be no reaction in the active list until the first of May.

Outlook More Favorable Than Some Would Have the World Believe.

That Boston circles believe as firmly as ever in the future of copper, and that better times for the red metal will come with better times in general bus iness circles, was the gist on Saturda on the remarks of Arthur W. Chester ton of Boston, who is extensively in terested in the mines of Utah. Mr. Chesterton is a director of the Consoli dated Mercur Gold Mines company, and is president of the Boston-Sunshine company of the Mercur country, and portion of the numerous options held through whom the Boston portion of the

company's name was derived.

Mr. Chesterton believes that the present low price of copper is bound to encourage consumption, for with the metal at its present level it is too cheap not to supplant substitution of other metals for the thousand and one things the red metal is needed for in busi-Boston believes, too, that the ex act figures showing excess of copper production over consumption are not as disheartening or excessive as some who have figured would have the world be

During his visit to Utah Mr. Chestern will make an inspection of the two Mercur mines and mills mentioned, and will take a look through some of the Bingham copper properties in which he is interested. Reports from the new mill of the Boston-Sunshine company are so favorable that Mr. Chesterton will find everything undoubtedly in splendid shape. The management last week is understood to have extracted and appropriate the strategy of the strategy o an average of close to ninety tons o ore daily, all of which is being fed t the mill in addition to the accumulate rock that has been stored away in th So the plant is not far from normal capacity, namely, 150 tons dai

Ore Shipments.

The Pieneer sampler on Saturday re-leased 4 cars of ore from Utah. The Taylor & Brunton Co. released 12 cars from Utah camps.

Mining Notes. Liew Humphries, consulting engineer the Mason Valley company, is enof the Mason Valley company, route to the property in Nevada, E. C. Davies has returned from Tintic and reports everything at the smelter in very successful operation. The May Day management is reported to be very close to the 1000-foot level, and drifting toward the Godiva property soon will be under way.
